

Pricing

A fixed price for each matter, quoted in writing before any work starts, so it can go on the client's bill as a case cost.

Standard matter: \$400

One account you name (usually the person your client is suing or complaining about), over a date range you choose, up to about 500 posts in all. It covers:

- Everything that account posted in the range: its posts, its replies, its reposts and its quotes.
- The conversations those posts are part of: your client's replies and other people's replies in them, so the court sees the whole exchange. People who appear there are not charged as extra accounts.
- Any post the account quoted or reposted that you point out, captured as the original.

Standard delivery is within 2 to 5 business days of your go-ahead, depending on the size of the matter. Capture itself starts the same day, so the posts are preserved even if they are deleted while the packet is being prepared. For complex matters, we work to your deadlines as far as we can.

Extras

ITEM	FEE
Each additional account you name in the same matter, on the same terms (up to 2 more)	\$200
One X Spaces room of up to 3 hours, with everything listed under X Spaces on the Features page	\$150
Same-day delivery (rush)	+50%

Quoted per case

Most matters fit the standard one. These are priced in the written quote before any work starts:

- More than about 500 posts, for example a long date range or a very active account.
- More than 2 additional accounts.
- More than one X Spaces room, or a room longer than 3 hours.
- A pile-on by many accounts, or everything posted about your client by anyone.
- An account's full history, going back years.

What is not included

- Finding other accounts, or deciding which posts matter to the case. You name the accounts, posts, date range or key words; we capture exactly those.
- Anything added after the quote. If the scope grows, the addition is quoted in writing before it is captured.

Included in every matter

Everything listed under "What you receive" and "Confidentiality" on the Features page (exhibitproof.com/features), the signed declaration included. No extra fee for any of it.

If the capture is challenged

ITEM	FEE
Deposition or trial testimony about how the capture was made	\$300 per hour, 2-hour minimum, plus reasonable travel expenses (transportation, lodging and meals)

How it works

1. Send us the accounts, the date range or key words, and any X Spaces rooms.
2. You receive a written flat-fee quote, usually the same day.
3. Capture starts the same day as your go-ahead. Posts are preserved even if they are deleted afterwards.
4. You receive the packet, the spreadsheet and the signed declaration. Payment terms are set out in the engagement terms.

A Bitcoin timestamp is confirmed usually within a few hours of capture. On a same-day delivery a timestamp may still be pending; it is marked as pending in the packet and completed afterwards.

Prices in US dollars, as of October 2026. The written quote for your matter is the price that applies.

Terms used in this document

X AND ITS ACCOUNTS

X Spaces

Live audio rooms on X. A host runs the room, co-hosts and speakers talk "on stage", and everyone else listens in the audience. X sometimes keeps a replay afterwards.

PROOF AND INTEGRITY

Bitcoin timestamp (OpenTimestamps)

OpenTimestamps is a free, open service that writes a record's fingerprint into the Bitcoin blockchain. That proves the record existed no later than that date. Only the fingerprint is sent, never the post itself.

LEGAL TERMS

Engagement terms

The written agreement between the firm and us for a matter: what is captured, the fee, confidentiality, and how long material is kept.
